

Charging the battery procedures

1. Connect charger cord to charger
2. Plug into battery
3. Plug other end into outlet
4. Red light will show battery is charging (approx. 2-4 hours)
5. Green light will show battery charged

Note: Battery can be charged while on bike or can be removed. To remove push the level under the seat to angle seat up or just remove seat post all together. To remove battery push the key slightly in first and turn to unlocked position then slide battery up.

It is best to charge the battery when battery has cooled down not immediately after riding.
